

**BUSINESS PROCESS
IMPROVEMENT SPECIALISTS**

Lean Deployment Plan

Doing Business Better provides your business with a strategic business plan for future growth opportunities based on the deployment of Lean Thinking principles.

The plan examines the critical factors for successful and sustained Lean Deployment including the Executive mind-set, developing internal Lean Thinking capability, engaging the workforce, Learning to See, building Change Agents and capturing ideas for improvement.

A State Government subsidy may be available for eligible businesses to develop their own Lean Deployment Plan. Release time and effort and reinvest released value elsewhere.

Other Services

- Executive Lean briefings
- Consultancy services
- Public speaking and motivator
- Lean coaching

**Doing
Business Better**

“Learn to see process wastes and know how to fix business process problems.”

For information about process improvement training or project facilitation contact Stephen Grech today:

E. sgrech@doingbusinessbetter.com.au

Create the environment and capability to improve productivity, quality and reduce costs and time to grow your business.

Learn about the techniques used to increase productivity, add value, reduce costs, do more with less – less time, less costs, less down time, less process waste.

Doing Business Better is a productivity improvement specialist company established to assist small and medium sized businesses, not-for-profit organisations and government agencies to save time, reduce costs and increase productivity by eliminating non value adding activity.

Training

Doing Business Better provides hands-on, practical training in a number of business improvement methods, tools and techniques. We transfer the knowledge of improvement techniques into your business.

These improvement techniques include:

- Lean Thinking
- Value Stream Mapping
- 5S
- Six Sigma

Introduction to Lean Thinking

Lean Thinking is a business methodology aimed at the elimination of business process waste.

In this one day workshop you will gain an overview of Lean Thinking principals, learn the process improvement secrets of 120 organisations and gain an understanding of the Lean Tools that can be applied in your own business to harvest benefits. Open your mind to immediate improvement opportunities.

Value Stream Mapping

Value Stream Mapping is a powerful and engaging tool to rapidly identify opportunities for process improvement with your staff, in your business.

In this one day (introduction) or two day (advanced) workshop you will gain the skills and knowledge to start mapping processes which will feature less delays, bottlenecks, over processing and re-work. Save unnecessary wasted time and effort today.

Introduction to Six Sigma

Six Sigma is a set of structured techniques and tools for solving significant business problems.

In this one day workshop you will gain an overview of the DMAIC steps of Six Sigma and learn how this method of business improvement can be applied in your workplace to eliminate errors and a reduction in variation found within processes.

5S in the Office

5S stands for Sort, Set in Order, Shine, Standardise, and Sustain.

5S in the Office is a 5 step process aimed at reducing waste and optimising productivity through maintaining an orderly workplace and using visual cues to achieve more consistent operational results. In this one day (introduction) or two day (advanced) workshop you will learn how to apply 5S in the office in your own business to immediately save time, reduce production costs and increase productivity.

Process Improvement Projects

Deliver productivity and quality improvement projects using Lean and Six Sigma techniques focusing on the elimination of unnecessary process waste including time, effort, duplication of effort, defects and variation.
